

Insurance Coverage (Policyholder)

It can be frustrating and of great significance to clients upon learning the company they bought insurance from is refusing to hold up its end of the bargain. Tousley Brain Stephens has helped many policyholders who have been wrongfully denied insurance coverage or treated unfairly by their insurers, and recovered millions of dollars in policy benefits that would otherwise have gone unpaid.

We help policyholders in the areas of construction defects, builder's risk, property damage, environmental liability, general liability, advertising injury, title insurance, professional liability, D&O, employment practices, and employee theft. We also prosecute claims against insurers for bad faith denials of coverage and violations of Washington's Insurance Fair Conduct Act, and work with our clients on the most cost-effective way to do so, whether through hourly fees, contingent fees, or a hybrid fee arrangement
